## hygger Ceramic Bio Media Blocks

hygger Ceramic Bio Media Blocks are the perfect filter media for various aquarium filtration solutions.

**ATTENTION:** The functionality of this bio filter media is not affected if it breaks or becomes detached.

### 1. PRODUCT FEATURES

**Efficient mechanical and biological filter media:** hygger aquarium biofiltration media also called as far-infrared bacteria house which is made from kaolinite and tourmaline. It's a kind of ceramic that has been heat treatment at 1800 degrees Celsius for 24 hours. creating an extremely porous structure with a larger multi-faceted surface area for enhanced biological filtration. It efficient mechanical and biological filtration, adsorb impurity and hazardous substance, decompose fish feces and residual fish food, eliminate harmful bacteria, clarify the water crystal clear.

**Cultivate beneficial bacteria:** Far-infrared bacteria house with porous structure, to promote the proliferation of beneficial bacterium. Its huge specific surface area enhances the ecological filter processing capability. Additionally, this filter media provides rich minerals and trace elements, which can be absorbed by fish under certain conditions.

**Increase dissolved oxygen:** This product can enlarge the area of effective bacterium, favors the reproducing of effective bacterium. The hollow design ensure effective water flow distribution and enhances the dissolved oxygen levels in the aquarium. The bacteria house emits FAR infrared rays, breaking the bonds of neighboring water molecules thereby allowing for increased oxygen dissolution.

**Cost efficient and durable after-filter media:** This biofiltration media is recommended to use as after-filter material, can be reused, also long lasting.

**Suitable for freshwater and saltwater:** The pH value of this biofiltration media is neutral. Its suitable for both indoors and outdoors usage as it is specially designed to work effectively in various filtration systems such as koi pond filters, overhead filters, canister filters, sump filters, wet and dry tricking filters, internal and external overflow systems, etc.
